A tech enthusiast with 9 years of experience in software development, cloud architecture, and data engineering. I thrive on turning big ideas into scalable, impactful solutions. Whether by driving innovation with my team or building something from the ground up. My entrepreneurial mindset allows me to see the big picture while my engineering skills focus on creating practical, high-performance systems. I'm always eager to mentor, collaborate, and tackle challenges head-on, helping businesses grow and innovate through technology.

WORK EXPERIENCE

Senior Data & Cloud Engineer
2023 - Present

Moodagent | moodagent.com | Copenhagen, Denmark

- Built and optimized data pipelines and cloud infrastructure for a white-label music streaming service used by telecom giants to reach millions of users.
- Collaborate with cross-functional teams to optimize cloud-based solutions and improve data flow, ensuring efficient delivery of music content.
- Encouraged knowledge sharing through pair programming, boosting team collaboration and overall efficiency.

Engineering Lead
2015 - 2023

Mysocial | mysocial.io | Malmö, Sweden

- Co-founded Mysocial, an "influencer manager in your pocket" platform, now trusted by 100k+ users.
- Architected the entire platform, from front to backend to cloud infrastructure, fueling rapid growth and feature delivery.
- Led a talented team to build microservices, APIs, and a recommendation engine that helped social media creators grow their careers and collaborate.
- Owned every step of the product life cycle, making sure we stayed ahead of the curve with innovative solutions and a seamless user experience.

Senior Software Engineer
2019 - 2021

Passenger One AB | Malmö, Sweden

- Developed a real-time car-sharing platform from scratch, growing it to serve 20k+ riders with smooth, scalable performance.
- Lead the backend development and DevOps processes, cutting deployment time with automation and CI/CD.
- Coordinated the engineering team, ensuring we delivered a high-performing product while maintaining the cloud infrastructure.
- Worked closely with stakeholders to align technical goals with business needs.
